

Fluctuations in Structured Coulomb Fluids: A Project and its results

Ralf BLOSSEY

Unité de Glycobiologie Structurale et Fonctionnelle (UGSF) - SF UMR 8576 CNRS / Université Lille I

In this talk I will present an introduction into an ANR project “Fluctuations in Structured Coulomb Fluids” of which this two-day workshop constitutes the final scientific progress report. The talk is organized in three parts: 1) an introduction into the physical problem, 2) our planned project, 3) some highlights from our achievements and failures.
